

VIPER

The creasing-innovation with a bite

According to your needs!

The e+s VIPER creasing rule has one or two scoring bevels on the creasing head to create small scoring lines in the material. The result is a perfect straight crease of the corrugated board and an outstanding folding result. Liner cracking is minimized to eliminated.

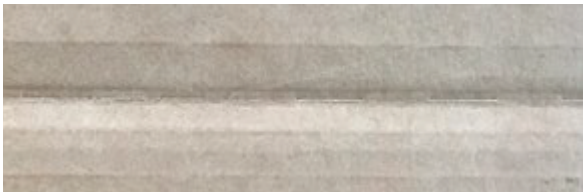

Improve your creasing results of the corrugated board to the next level.

Advantages

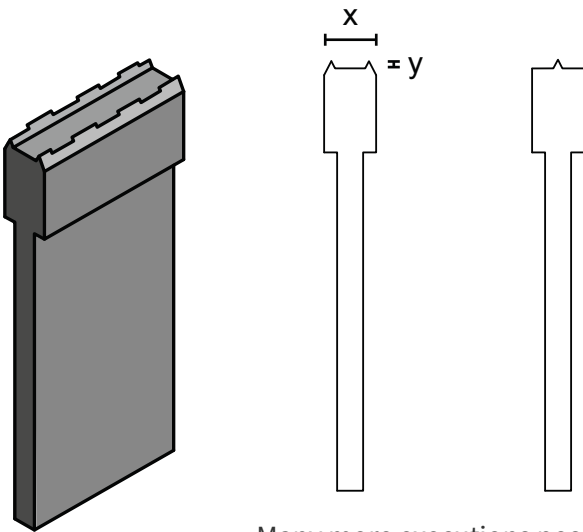

- no more creasing matrix necessary
- no more cleaning of the Cutting Plates
- shorter machine make ready time
- perfect straight crease
- maximized Customization
(of heights, scoring design, etc.)

Processed with a standard
crease / cutting rule.

Processed with the e+s VIPER.
(No cracking of the material)

Many more executions possible.

Technical specifications

- e.g. 3 Pt (1.05 mm) base and 8 Pt (2.84 mm) head
- e.g. 4 Pt (1.42 mm) base and 8 Pt (2.84 mm) head
- flat Head with additional scoring of
e.g. 0.3 mm, in a centric or lateral design
- additional perforation fitted to your
requirements e.g. 10:10 mm

**Magnitude of X and Y
for the Viper are individually
adaptable.**
