

PRECISION IN FORM

ESSMANN + SCHAEFER GMBH + CO. KG

TRUST IN THE FOURTH GENERATION

ESSMANN + SCHAEFER GMBH + CO. KG

When every millimeter counts,
we at Essmann + Schaefer take accuracy
very seriously. For more than 60 years,
we have been developing and manufacturing
unique flatbed and rotary cutting rules
that meet your exact requirements.

E+S

INTERNATIONAL

Our core markets are the
die makers and packaging
industries worldwide.

BUILD ON OUR EXPERIENCE: WITH THESE TOOLS EVERYTHING RUNS SMOOTHLY!

Only good tools do a good job – especially when it comes to extreme precision. It was out of this conviction that Wilhelm Essmann Sr. and Paul Schaefer Sr. founded the first company in 1949 for the professional manufacture of cutting and creasing rules in Germany.

Today, Essmann + Schaefer is one of the leading companies in the production of cutting, scoring, creasing and perforating rules of all kinds. But that's not all; we also have cutting rules for labels, foils, cardboard, corrugated board and other materials. Every day, new creations are developed

with our tools, which truly impress in terms of their form, design and accuracy of fit.

And Essmann + Schaefer is still in family hands to this very day – with Horst Peter Kämmerling-Essmann and Daniel Kämmerling-Essmann in the fourth generation. That is why we know exactly how important trust, reliability and quality awareness are, and why we always base our work on these values. Not only is this appreciated by our customers, but also by our nearly 60 employees at the Wuppertal-Ronsdorf site.

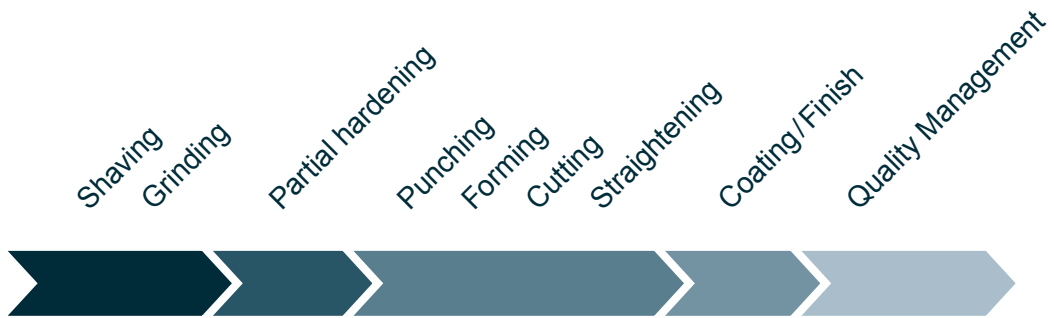

CONSTRUCTIVE SOLUTIONS THROUGH OPTIMIZED PROCESSES

**OUR PRECISION IS YOUR
ADVANTAGE**

Perfectly cut - in two respects:
We manufacture according to your wishes and align our processes to supply you with the right product for every application. So you always have your and our best result in your hands!

OUR PRODUCTION PROCESSES

Controlled quality: For each production line detailed documentation is made and all processes are analyzed. This guarantees exact reproducibility and constant results which facilitate your planning processes. And that's approved according to ISO 9001:2015.

Packing according to customer requirements

1

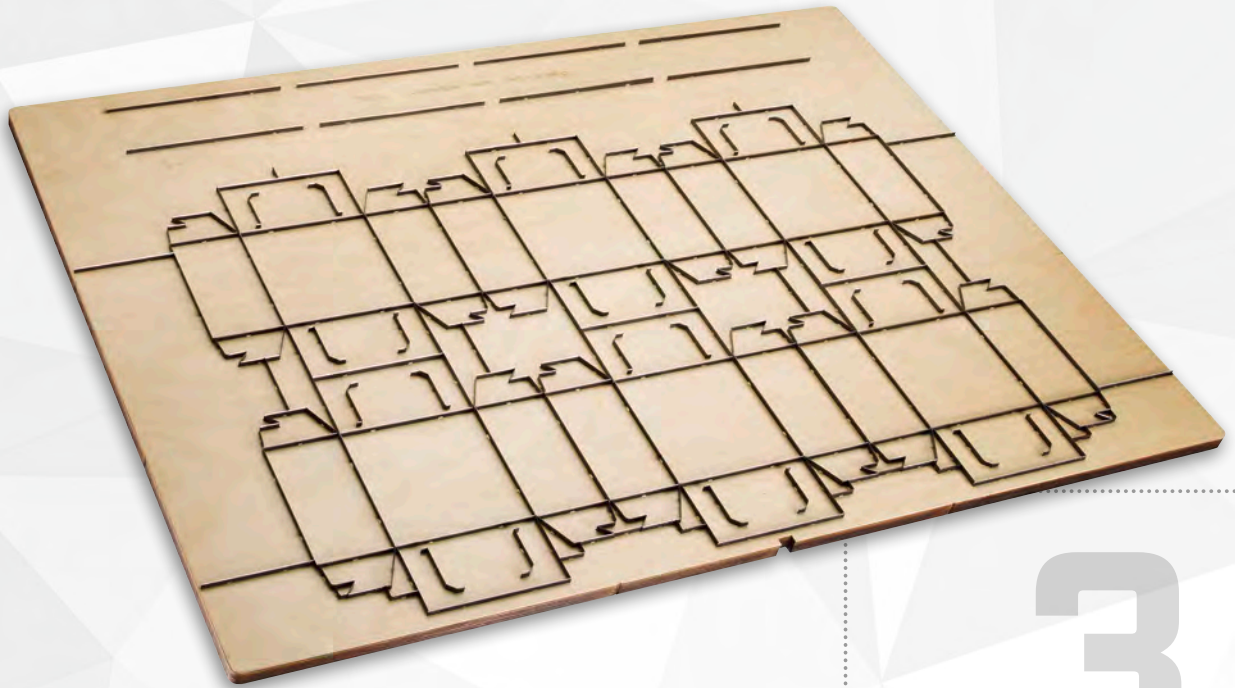

RAW MATERIAL

We receive our raw material as rolled material, which is then further processed in multi-layered processes.

FROM STRIP STEEL TO PACKAGING

**PRODUCED WITH CARE
AND INTELLIGENCE**

Precision not only defines our products – it also guarantees sophisticated, economical production processes, in which unique tools are created from the best materials.

3

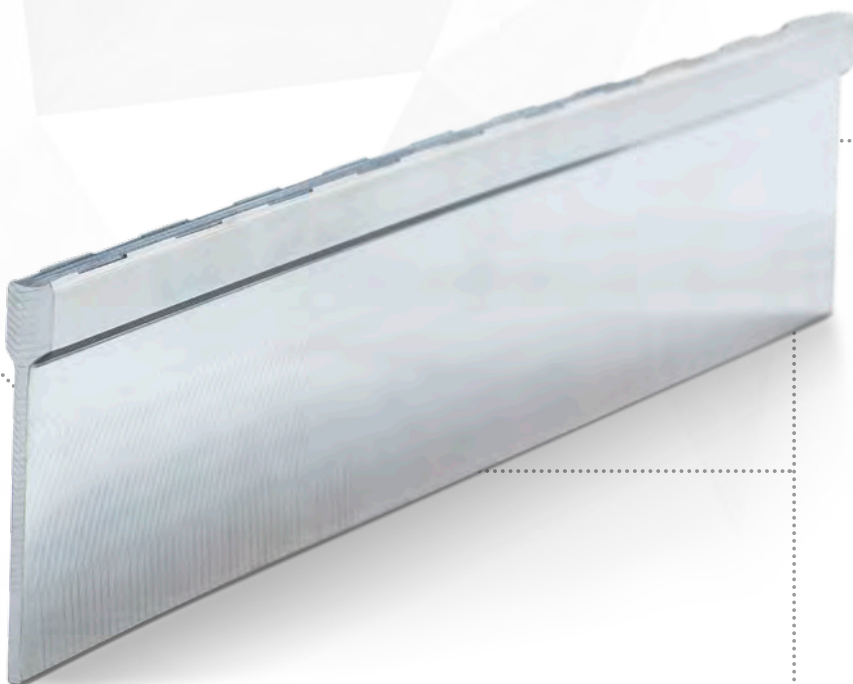

INDUSTRIES

Our products are used in cutting dies for a wide variety of industries and areas and give cardboard, corrugated board, thermoforming, labels and many other materials a new shape time and again.

4

FINISHED PRODUCT

The finished end product – die cut with precision tools that meet the very highest demands.

2

SPECIAL RULES

We offer a wide range of special rules and solutions for your daily challenges. We continuously develop new products that make your everyday life easier.

FOR YOUR SPECIAL SIZES

STRAIGHTFORWARD SOLUTIONS INSTEAD OF ADAPTED STANDARDS

In many areas of application, a standardized tool is just not enough. Only an individual solution for your geometry leads to the desired result. With expertise, experience and an eye for detail, our employees develop the right equipment for your needs.

BUNDLED COMPETENCE FOR FAR-REACHING KNOW-HOW

In our in-house tool manufacturing unit, we not only manufacture the majority of our tools ourselves, but also repeatedly develop special production machines with which we implement the individual wishes of our customers exactly according to their requirements.

With 60 years of experience in special rules and tool construction, we are there where it counts when it comes to flexibility, creativity and innovative technology. This makes us unique and provides you with unimagined possibilities.

FIELDS OF APPLICATION

- Thermoforming and labels
- Continuous form industry
- Automobile industry
- Food industry
- Many other possible applications

A STRONG WE

THE PEOPLE BEHIND THE TECHNOLOGY

Without a strong team there can be no precision products. A sense of community among colleagues as well as identification with one's own company are essential components of our company philosophy. It is important to us to invest in the development and training of our employees in order to offer them the best opportunities for development and space for their ideas. In a family-like atmosphere, we produce tools that we back 100 %.

It all began with a knock on the door and ended with a position as department head.

In between there was a time with many challenges, personal development and an ever stronger sense of togetherness among the colleagues.

This has encouraged me to take more and more responsible tasks.

Hartmut Fuß

35 years with the company

Head of the Perforation Department
